📁 PROJECTS

Personal Portfolio 🔗

Technologies : React.js, React-bootstrap, MongoDB, Express.js
Developed a fully responsive and dynamic personal portfolio website to showcase my skills, projects, and experience as a MERN stack developer. This website is designed with React for component based architecture and React-Bootstrap for styling and layout.

Quora UI Clone 🔗

Technologies : React.js, Material UI
Developed a responsive Quora clone, replicating the core UI and functionality of the platform using React.js and Material UI. Key features include a dynamic feed, question and answer posting, and user authentication. Emphasized reusable components, state management with hooks, and Material UI for a modern, intuitive user interface
